Art Unit: 2833

1. The disclosure is objected to because of the following informalities:

- Reference to many of the figures is incorrect. For example on line 2 of paragraph 2 “Figs. 14 and 15” are mentioned. There is no figure 14 or 15 in the present application. Applicant should refer to figs 14a, etc. as there are found in the drawings.

- Paragraphs 23-27 should indicate that the drawings described therein are exploded views.

- It is unclear how the retainer 25 can move in a widthwise direction as stated on paragraph 41. Figs. 4 and 5, which appear to indicate two different structures as 25, add to the confusion.

- Paragraph 67 refers to structure “indicated by phantom.” However, the members in that sentence are not shown in phantom and no other appropriate phantom lines are present in Fig. 13.

Appropriate correction is required.

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

3. Claim 6 is objected to because it appears that -wherein-, or something similar should be added before “the” on line 1. In addition, the pushing surface on the mating housing is not part of the connector housing 20 that is the subject of claim 1 (from which claim 6 depends). It is unclear how claim 6 further limits claim 1. Appropriate corrections are required.

4. Claim 1-12 contain allowable subject matter.
